

Experiment 11

Problem:

Maintain a simple employee database using file handling (write/read records).

Student Details:

Name: madhiya zaid javed Roll No: 36 UIN: 251M040 Division: F

Code (C):

```
#include <stdio.h>
#include <string.h>
struct emp { int id; char name[50]; float salary; };
int main(){
    char student[] = "madhiya zaid javed"; int roll=36; char uin[]="251M040"; char divc='F';
    FILE *f = fopen("empdb.bin","wb");
    struct emp e1 = {1, "Alice", 50000.0}, e2 = {2, "Bob", 45000.0};
    fwrite(&e1, sizeof(e1), 1, f);
    fwrite(&e2, sizeof(e2), 1, f);
    fclose(f);
    printf("%s Roll:%d UIN:%s Div:%c\n", student, roll, uin, divc);
    printf("Written 2 employee records to empdb.bin\n");
    // Reading back
    f = fopen("empdb.bin","rb");
    struct emp r;
    printf("Records read:\n");
    while(fread(&r, sizeof(r), 1, f)==1){
        printf("ID:%d Name:%s Salary:%.2f\n", r.id, r.name, r.salary);
    }
    fclose(f);
    return 0;
}
```

Sample Input and Output (example run):

Output:

Written 2 employee records to empdb.bin

Records read:

ID:1 Name:Alice Salary:50000.00

ID:2 Name:Bob Salary:45000.00
