

Experiment 1

Problem:

a) Read marks of Physics, Chemistry, Mathematics (PCM) from user, find average and eligibility (Assume eligibility if average ≥ 40)

Student Details:

Name: madhiya zaid javed Roll No: 36 UIN: 251M040 Division: F

Code (C):

```
#include <stdio.h>
int main() {
    char name[] = "madhiya zaid javed";
    int roll = 36;
    char uin[] = "251M040";
    char divc = 'F';
    float p,c,m,avg;
    printf("Enter marks for Physics Chemistry Mathematics (space separated): ");
    if(scanf("%f %f %f",&p,&c,&m)!=3) return 0;
    avg = (p + c + m)/3.0;
    printf("\nStudent: %s\nRoll: %d UIN: %s Div: %c\n",name,roll,uin,divc);
    printf("Average = %.2f\n", avg);
    if(avg >= 40.0) printf("Status: Eligible\n");
    else printf("Status: Not Eligible\n");
    return 0;
}
```

Sample Input and Output (example run):

Input: 65 70 55

Output:

Student: madhiya zaid javed

Roll: 36 UIN: 251M040 Div: F

Average = 63.33

Status: Eligible
